

SUMMARY

AI engineer and IT graduate of FPT University who builds LLM applications that work and are measured. Built ShopMate, a RAG + agent sales assistant scoring 31/33 correct answers on a locked test set at 2.6 s median latency and ~US$0.9 per 1,000 conversations. 4-month backend internship (FastAPI, MongoDB, AWS) on products for the Australian market. Proactive, disciplined, measures before concluding.

SKILLS

AI / LLM
Python · ML/DL fundamentals · RAG · Embedding · Prompt engineering · AI Agent (LangChain/LangGraph) · Vector Database · Fine-tuning · vLLM

EVALUATION & MONITORING
Golden set · MRR / Recall@k · Latency / cost · Tracing · Langfuse

BACKEND & DATA
FastAPI · REST API · Microservices · PostgreSQL · MongoDB

DEVOPS / MLOPS
Docker · CI/CD (GitHub Actions) · AWS (basic) · Git · Linux (basic)

EDUCATION

Information Technology
FPT University · 2022 – 2026

LANGUAGES

English — technical reading, work meetings.

AWARDS & CERTIFICATES

Top 15 — FPTU Can Tho Olympic AI 2026 "AI for Smart Mekong Delta" · FPT University Can Tho, 2026

Practical AI Training Program · FPT University Can Tho, 07–08/2026

TRAN QUANG DUYEN

AI Engineer · RAG · AI Agent · LLM Systems

tranquangduyen2503@gmail.com | +84 398 116 991 | github.com/duyentq-aie | Vinh Long, Vietnam

WORK EXPERIENCE

Backend Developer Intern
10/2024 – 02/2025

Biwoco Co., Ltd. · Software for the Australian market · 4 months

Python · FastAPI · MongoDB · AWS · Microservices · REST API

- Built and maintained REST APIs with FastAPI for company projects, including input validation and backend business logic.
- Worked with AWS and a microservice architecture to build and maintain backend services.
- Stored and queried data in MongoDB for assigned features.
- Clarified requirements and reported progress in English-language meetings with overseas partners.

PROJECTS

ShopMate — AI sales assistant for a fashion store
10/2026

Personal project · github.com/duyentq-aie/shopmate

Python · LangGraph · Gemini · Qdrant · bge-m3 · Saleor (GraphQL) · FastAPI · GitHub Actions

- Built a shopping agent that answers product, return-policy and order-status questions on a Saleor store (250 products); read-only access, max 8 steps, support tickets only after the customer confirms.
- Raised search accuracy for Vietnamese queries typed without accents by **+0.43 MRR** (95% CI 0.27–0.58) by fusing accent-folded keyword search with bge-m3 semantic vectors in Qdrant.
- On a locked test set run once (33 questions): **31/33** correct answers, intent routing **33/33**, 2.6 s median latency, ~US$0.9 per 1,000 conversations; a code-level guardrail blocks replies with a wrong price.
- Evaluated like an experiment: 104-question golden set, test split locked and run only once; GitHub Actions CI runs 1,600+ automated tests and secret scanning.
- Shipped an embeddable chat widget and a dashboard that traces every request from question to AI reply.

DevPrep — AI mock-interview platform
2026

Capstone project (team) · github.com/Usopp204/DevPrep · FPT University

.NET 8 · YARP · FastAPI · Gemini · ChromaDB · InsightFace · SpeechBrain · Docker

- Owned 3 services (interview, grading, web client) and co-owned the AI service in a 10+ microservice system.
- Built answer grading with Gemini against reference answers retrieved from ChromaDB on a 50/30/20 rubric; background grading, duplicate-grading guard and IDOR protection on reports.
- Built biometric anti-cheating: face and voice enrollment, verification before each session and periodic face checks during the interview.
- Built a voice interview room (Deepgram speech-to-text, Piper text-to-speech); race-free credit charging with one atomic conditional UPDATE.
